Summary

I am interested in Web Development, Coding, Logo Designing, Chess, Basketball, Volleyball and learning new Programming Languages and seeking exciting opportunities related to the same. In the User Experience Design field, I am looking for being a Full-time User Experience Designer. I am also looking forward to coding in the upcoming years. I am also a stock market enthusiast. I am also freelancing on different platforms as a side hustle.

Being in Private Schools, I have been repeatedly exposed to new cultures and diverse groups of people. This has made me able to quickly adapt to changes and gain a broader perspective. I am always curious about things and enjoy learning. I like to solve problems and fix errors. I like to build logic behind every problem to solve it efficiently. I keep my goals and tasks organized to maintain productivity. I have been a part of my school and college fests also. Currently, I am a Design Lead in 2 MLH Guilds Coder's Evoke Community and Let's Build Together community.

The skills that I have attained from the dynamic environment and competitive university life define me, and I am looking forward to implementing and polishing them in any opportunity that I receive.

Feel free to go through my profile and approach me if you need any help, I will be glad to help you.
